PROFESSIONAL SUMMARY

Software Engineer with 9+ years of experience designing and delivering scalable, high-availability backend services and cloud infrastructure at Microsoft and Goldman Sachs. Specialized in distributed systems, Azure and AWS cloud services, and full-stack development across the gaming and fintech domains. Proven record of driving multi-million-dollar cost savings and revenue impact, owning projects end-to-end, and rapidly mastering unfamiliar domains. Holds a Master's in Computer Science with an Intelligent Systems focus (AI, NLP, ML).

TECHNICAL SKILLS

Languages: C#, Java, Python, JavaScript, TypeScript, SQL, PHP

Frameworks & Runtimes: .NET, ASP.NET, Spring Boot, React, Angular, Node.js

Cloud & DevOps: Azure, AWS, Terraform, Bicep, ARM, Docker, Kubernetes, Service Fabric, CI/CD

Data & Messaging: Azure SQL, SQL Server, Cosmos DB, MongoDB, MySQL, Redis, Kafka, Azure Service Bus, Event Hub

AI & Search: Azure AI Search, Vector Search, LLMs, NLP

Azure Services: Key Vault, Blob Storage, Storage Accounts, Azure Redis Cache

Practices: Distributed Systems, High Availability, Microservices, Automated Testing, Agile

PROFESSIONAL EXPERIENCE

Microsoft — Software Engineer 2

Redmond, WA | October 2021 – Present

Build and operate backend services powering all Xbox storefronts (search, browse, purchase) and the delivery of Windows updates to millions of devices.

- Engineered a geo-replicated Azure SQL failover group to keep services running through regional data-center outages, uncovering infrastructure and database-utilization optimizations that cut costs by **\$42,000/month** and improved performance.
- Prevented downtime during two region-wide Azure incidents via the failover design, protecting significant revenue, and shared the approach across teams for broader adoption.
- Delivered the Universal Media Search feature on schedule by aligning multiple stakeholders and resolving ambiguous requirements early.
- Contributed to multiple initiatives with a combined revenue impact exceeding **\$1.5 billion**.
- **Tech:** C#, .NET, Python, React, JavaScript, SQL, Cosmos DB, Azure, Terraform, Service Bus, Event Hub, Docker, Service Fabric, Kubernetes, Azure Redis, Azure AI Search, Vector Search, LLMs.

Goldman Sachs — Technology Associate

Richardson, TX | March 2019 – October 2021

Built automated agent-communication systems for the Apple Card and consumer savings/checking products.

- Took full ownership of the automated dialer project after the senior engineer transitioned off, delivering it end-to-end while integrating legacy vendor technology and gathering requirements directly from stakeholders in the absence of a product manager.
- Built an NLP-driven chatbot and intent-routing system that scaled inbound customer communication during COVID with no increase in agent headcount, auto-enrolling customers into the support relief program.
- **Tech:** Java, Spring Boot, MongoDB, Python, JavaScript, TypeScript, React, REST APIs, AWS, Kafka, Docker, Kubernetes.

Federal Reserve Bank of Chicago — Quality Assurance Engineer

Chicago, IL | July 2018 – March 2019

- Owned automated UI and backend test coverage for two teams simultaneously while also contributing development work — expanded from a single-team mandate based on delivery efficiency.
- **Tech:** Selenium, Java, JavaScript, Angular, TypeScript, Python, SQL, Apache, Jenkins, Git, AWS, Windows Server.

EDUCATION

Master of Science in Computer Science — Intelligent Systems & Interactive Computing

University of Texas at Dallas, Richardson, TX | GPA 3.88/4.0 | Aug 2016 – May 2018

Bachelor of Engineering in Computer Engineering

Gujarat Technological University, Ahmedabad, India | GPA 8.48/10 | Jun 2012 – May 2016
